WALL STREET, MONDAY, April 5-6 P. M. The stock market to-day showed a trifle of leverishness in the manner, or rather the results of its manipulation, but closed steady, and in some instances with firmness. Sundry ramors were prevalent in the board, under the influence of which Erie and Pacific Mail were snarply handled and declined. The former after opening at 29% a 30, receded to 29%, and ended at 29% a 29%. Patific Man opened at 45%, moved up to 45%, when considerable short sales were made, and the stock went off to 43%, closing at 43% a 43%. Western Union was subject to a bearish demonstration, growing out of the departure of the steamer Paraday and the renewed attempt to complete the cable that has been laid within a few hundred miles of our coast. While it was not generally given out as "a point" the effect of the completion of a rew intercontinental telegraph line was discussed in various circles, and there is a disposition to await the result before engaging in additional ventures. It would be among the curious events of the year it Atlantic and Pacific Telegraph and Western Union should meet on a common ground as regards real value and

The transactions in this stock amounted to 4,100 shares, although it is said that a large amount has recently enanged hands privately. The preferred stock sold at 57 a 67% a 57%. Hannibal and St. Joseph likewise maintained strength at 28%, with but slight fluctuptions in the face of somewhat depressing sur-roundings. Wabash opened at 15%, soid up to 15% and closed at 15%. Northwest common con-tinues to be one of the conundrums of the street, the movement in this stock being full of mystery, which loses none of his force by reason of the presence in the city of several of the influential officials and friends of the road. As a part of the gossip of the moment that must be taken cum grao salis, we record the rumor that arrangements are penging between St. Paul and Northwest for a combination of the respective interests of the two corporations. Rock island sold at 10214, ex dividend. Union Pacific gained 2% per cent, and after sundry curious fluctuations, which have become a part of its late daily experience, ended firm at 71%. Money during the greater part of the day was tionally and possibly for a speculative purpose the rate was bid up to 7 per cent, but the close was made at 5 and 6 per cent. GOLD, 114% A 114%.

Gold opened at 114%, and advanced to 114%, with the closing sale at 114%. The quiet manner in which the price has been advanced since last week is suggestive of a tresh movement. There is unquestionably a sharp buying process, and it is not impossible that the merchants, rather than trust to the contingencies of the next sixty days' are among the purchasers. Foreign exchange is near the shipping point, imports have to be paid for, and the Treasury will be obliged to disburse on and after the 1st of May in the shape of interest and for the redemption of its several calls of bonds so large an amount that the national coffers may be left compara-tively empty. These are the reasons given for the firmness of gold, and an explanation of any further strength that it may exhibit in the sear future. The rates paid for carrying were 1, L 14. 8, 2% and 4 per cent Gold loans on time are quoted at % a % per cent for use for 30 days, & a % per cent for 60 days, % a % per cent for 90 days, % a % per cent for 4 months, % a 1 per cent or 6 months, and 1% a 1% per cent for all the

MONDAY, April 5-6 P. M. The merchandise markets were more active to day, and in some departments an active trade was in progress, while better prices obtained. The chief interest centred in a few commodities however, in which there was a large speculative business on 'Change. Flour ruled steady. Wheat was in better request, but there was no marked change in figures. The market was generally considered easy, save for choice parcels in store. Corn was scarce and higher. Oats were firmer. Bariey was strong. Provisions were excited and higher under advices from the West, all kinds participating in the advance. Cotton was quiet and not materially changed for ettner spot or juture. Groceries to-day ruled quiet but continued firm. Freights were dull, both on the berth and for charter, and rates were in the shippers' favor. Petroleum was dull and closed essier. Naval stores met with a moderate trade and ruled slightly better. Whiskey was quiet and unchanged.

Corrow.—The sale of spot cotten was somewhat re-tarded by the high views of holders, who generally asked \$5c. a \$4c. per ib. shove quotations, while buyers were not willing to offer any advance. The inquiry was prin-cipally from speculators, spinners confining bids to small lots for present emergencies and exporters being out of the market altogether, except as they
